

CT - Liver Fat Assessment

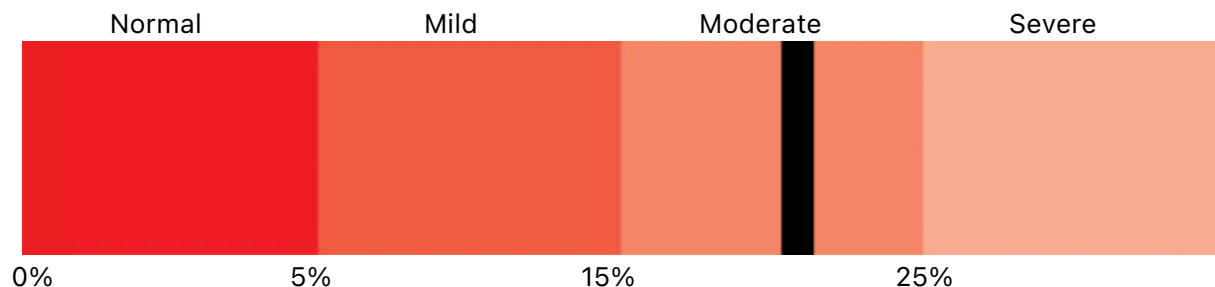

Patient Name: Fattyliver, Positive
MRN: 13964
DOB: 3/7/69

Gender: M
Scan Date: 12/1/23
Indication: Screening

	Results
CT DENSITY	29.8 HU
CT _{L-S}	-13.6 HU
LIVER FAT FRACTION	20.9%

STEATOSIS SCALE

LIVER FAT FRACTION

IMPRESSION:

1. Based on your liver analysis, you have moderate hepatic steatosis (excessive fat accumulation in the liver).
2. Hepatic steatosis can progress to more serious liver damage if left untreated, even if you are not currently having symptoms. Consultation with your primary care physician is recommended to review your medical history, physical exam, and lab results. Treatment options or lifestyle changes can then be recommended.
